

2020 - Part 1:

Songs about the first quarter of the year 2010 (or MMX, as the romans would have put it). First an incredibly heavy winter, with lots of snow and ice (1). The snow is all white and quiet outside, inside it is warmer (2). Too much work (3). Snow and ice starts melting, with some help, and a world emerges (4). Spring makes a hesitant entry, backs up and comes again (5). All is not happy (6). Light starts to return after the dark winter, even if it is not warm (7). There is even daylight early in the morning (8). April weather continues into May (9).

Recorded March - May 2010.

Made with Jack, Rosegarden, softsynths DSSI, fluidsynth DSSI.

Total playing time 1:18:45
